PRINTED CIRCUIT BOARD FABRICATION

Worried about late deliveries? Tired of poor quality or service?

PC Boards Domestic/Offshore

PCB Assembly Kitted/Turn-Key

Cable Assembly Prototype/Production

Value-Added Services/Solutions

At BENCOR, we deliver a quality project on-time and at an affordable price. From prototype quantities to high volume production, we have the right partners to meet your most difficult requirements.

We offer custom delivery options to meet your organization's complex inventory management goals, such as JIT delivery, scheduled orders and FREE safety stock options.

At BENCOR
we deliver all THREE!

PC Board Fabrication & Assembly

We can consult with you to lower your overall manufacturing cost by providing the right level of service to meet your specific needs. From quick-turn prototypes to high volume production, we can deliver a custom solution that is designed specifically to meet your manufacturing needs.

Our goal is to blend in seamlessly with your organization to allow you to deliver a quality project on-time and on-budget. Let our team of experts help you manage your next project from start to finish, or handle any aspect of your manufacturing process that will enable your business to gain a competitive advantage.

A Trusted Vendor Since 1992

At BENCOR we are proud of our highly satisfied customer base that we have served for many years. We are a rapidly growing company with a hands-on approach to business. Our stellar customer service and sincere personal attention are reasons why a large part of our business comes from customer referrals.

BENCOR CAN DO IT

ELECTRONIC VALUE ADDED SERVICES:

ISO 9001:2008 REGISTERED

PCB Design:

- High Speed Analog & Digital Design
- Differential Pairs
- Controlled Impedance
- High Temperature
- Matched Length Lines
- Multi-GHz Characterization Boards
- Probe Cards
- Down-Hole Design

Procurement:

- Safety Stock
- JIT Service
- Lab Stock
- Kitting
- Date Code Tracking
- B.O.M Cost Reduction

Reverse Engineering:

- Schematics
- Bill of Material

Test Engineering:

- Test Fixture Design
- Test Process Development
- Test Plan Development
- Functional Test
- Project Management

Embedded Firmware:

- PIC Micro Controllers
- FPGA Design

Technical Writing:

- Quick Start Guides
- Help Text
- Engineering Reference Specifications
- User Manuals

Training:

- IPC
- ISO
- SMT Soldering
- Process Control

ESD (Static Control)

- Auditing
- Compliance Support

PCB FABRICATION CAPABILITIES:

Prototype | High Volume

Domestic:

Up to 30 layers
Largest Panel Size: 20 x 34
Line/Spacing: 4/4mils
Controlled Impedance
RoHS and Lead Free Materials
ENIG (Gold) Plating
Blind / Buried Vias (resin filled)
Quick Turn (as fast as one day)
IPC/ISO/UL

Off-Shore:

Up to 18 layers
Largest Panel Size: 40 x 34
Line/Spacing: 3/3 mils
Controlled Impedance
RoHS and Lead Free Materials
ENIG (Gold) Plating
Blind / Buried Vias (resin filled)
Quick Turn (10 Days)
IPC/ISO/CQC

ASSEMBLY CAPABILITIES:

Prototype | High Volume

PCBA
BGA / BGA Rework
Cable Assembly
Box Build
Kitting
Complete Turn-Key Service
Class 3 Assembly Option
